Gravity Office Solutions

Leaders since 2007 in the field of digital office automation and the ICT space. Gravity Office Solutions is a company committed to the highest standards of product and service delivery. We place great value on ethical business practices and client satisfaction. With extensive experience and understanding best practice measures, we offer a hands-on, comprehensive and direct-line approach as a total turnkey ICT partner, to ensure the seamless integration of complex technology types in the ever-changing office environment.

Behind every strong brand, there is a strong leader whose beliefs and principles form part of the company ethos.

"We occupy a dominant position in our field and are held in high regard by our world-class suppliers for good reason. We seek out highly advanced and top-quality office technology. We uphold solid business practices which aim to exceed expectations. We focus on consistent outstanding customer service. By walking alongside each customer as they plan their ICT strategy, we can ensure that their decisions achieve the desired, optimal results." Ian Dornan – Managing Director

Reasons to choose us:

- We pride ourselves on our product offering and the highest level of personalised service.
- Our turnkey approach gives our clients the option and peace of mind of not having to manage multiple vendors in the hope of seamless integration and co-operation.
- Our network incorporates the largest mix of connectivity types giving our customers flexibility which includes ADSL, LTE, Microwave and Fibre with low cost, best effort broadband and premium dedicated options.
- Our coverage is far reaching for even the most remote locations lacking fixed infrastructure and poor LTE signal.
- With a localised and mirrored data centre we comply with data storage regulations and offer a 99% uptime.
- Tailor-made SLAs are offered to cater for our customers' unique requirements which include training and upskilling customer employed IT teams who believe it is critical to contribute to their first line support.

! Gravity Office Solutions is a highly professional and dedicated company operating in the arena of the Digital Office Automation industry and ICT space, providing a total, holistic approach. !

Our Products and Services

We take pride in the consistent quality, efficiency and durability of our wide range of products. Our holistic approach has added a new and welcome dynamic to the South African Automation and Digital Space.

Office Automation

Staying true to the vision of creating office environments that are fast, professional and efficient, we stock high-end black and colour digital copiers, printers and fax machines. With global industry brands such as Toshiba, OKI and Canon we offer total document and managed print solutions including MFP, wide format, production printing, CAD, graphic art and document management solutions.

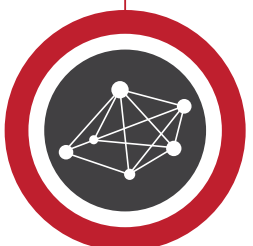

PABX

We offer both on-site, hosted and hybrid solutions using either cost effective open source or proprietary OEM brands. These offer basic and advanced telephony features on demand for short term ROI trials or long-term plans for established business departments who have precise needs to cater for their clientele such as call centres. Our product offering includes flexible low cost options or industry and Gartner Magic Quadrant leading Grandstream and NEC options for state of the art performance and functionality. Rivalled by Cisco, Avaya and Microsoft.

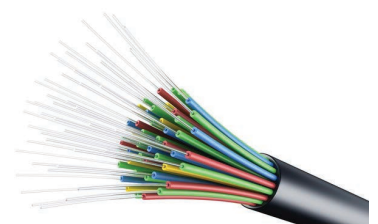

Cyber Security

Cyber security is a prime concern of any 21st-century business. Clients want to be reassured that they are tightly protected against cyber-crime as the war on data integrity advances. Cyber security technology is a vital component of our wide portfolio of products and it's our priority to supply the optimal solution for our clients.

Connectivity

We provide our customers with voice and data solutions over Fibre and Wireless networks which utilise the ubiquitous Fibre footprint of many tier 1 carriers and the resilient presence of the largest data centre in South Africa Teraco, reducing costs while increasing performance and reliability.

CCTV and Security Control Systems

High security demands have been placed on all companies, schools, religious institutions and home environments throughout South Africa. Now, more than ever continuous protection, remote viewing and access control is critical to keeping safe what you value most. We are positioned to meet your security needs from specialised high end CCTV/ Access control projects right down to your simple 4-camera deployment. We advise, install, service and manage all CCTV requirements across IP Networks or Analogue infrastructures including Time and Attendance with access control to ensure limited and controlled access to authorised staff; Gate Automation/Electric Fencing to ensure all boundary access is managed and protected. Please do enquire about our Guard Tracker product whereby your security company is held accountable for services paid for.
